Artificial Intelligence Lab - 8

Aim: Implementation of knowledge representation schemes – USE CASES

Algorithm:

- 1. Start
- 2. The user is expected to think of a animal and answer to the questions shown in the prompt.
- 3. The user answers the set of questions and the inference rule is drawn from it.
- 4. IF a conclusion to the premises result true it would display the name of the animal otherwise the machine learns from the given set of input.
- 5. Repeat step 2 to 4 if the user want to make the guess again otherwise go to step 6.
- 6. Stop

Identification of animal: cheetah: mammal, carnivore, verify(has_tawny_color), verify(has_dark_spots). tiger: mammal, carnivore, verify(has_tawny_color), verify(has_tawny_color), verify(has_black_stripes). giraffe: ungulate, verify(has_long_neck), verify(has_long_legs). zebra: ungulate, verify(has_black_stripes).

```
Classification rules:
mammal:-verify(has_hair), !.
mammal:-verify(gives_milk).
bird:-verify(has_feathers), !.
bird:-verify(flys),
verify(lays_eggs).
carnivore:-verify(eats_meat), !.
carnivore:-verify(has_pointed_teeth),
verify(has_claws),
verify(has_forward_eyes).
ungulate:-mammal,
verify(has_hooves), !.
ungulate:-mammal,
verify(chews_cud).
```

```

Output:

```
Imagine an animal. I will try to guess which one.
You are only allowed to answer YES or NO.

Does it have fur?
yes
Does it have dark spots?
yes
Is it the fastest animal?
no
Were you thinking about a leopard?
yes
I knew it!

Do you want to play again?
no

Process exited with code: 0
```

Astificial Intelligence Lab Lab-8

Aim: Implementation of knowledge representation schemes - use cases.

Initial State? (Make a guess)

Final State
Yes or
Learn a new concept

Problem Formulation -

Given some classification sule and some predefined clauses, guess an animal and let your machine predict it, IF the machine is unable to predict the animal, it will ask the answer and store it in it's knowledge base.

Problem Solving

Imagine an Animal (You are only allowed to answer yes or No to the next set of Questions)

- → boes it have a fur?
 Yes
- → Does it have dank spots? - Yes
- Is it the fastest animal?

of Leopard? Yes

I Knew it!
